PASSING AWAY.

All Appearances of Serious Trouble with Chili.

All Rumors to That Effect Without Foundation.

Notwithstanding the Reports to the Contrary.

So Says The Liberal Electoral, of Valparaiso, the Semi-Official Organ of the New Government—A Cabinet Member Interviewed as to What Course the Administration Will Take.

New York, Nov. 2.—The New York Herald's Valparaiso dispatches say that from all appearances the danger of any serious trouble between Chili and the United States over the Baltimore outrage is rapidly passing away.

The Liberal Electoral, the semi-official organ of the junta, publishes an editorial which is calculated to set at rest any feeling of uneasiness which may have prevailed in Chili. It says that for the past few days rumors have been prevalent at Santiago that an alarming rupture of amicable relations with the United States was imminent.

"We assure the public," it says, "that these rumors are unfounded." It adds that dispatches have been received from Senator Pedro Montt, Chilean minister at Washington, asserting that the utmost cordiality exists between him and Secretary Blaine.

"Senator Montt," continues the article, "had an important conference with Mr. Blaine, during which the latter said that he saw in the case no reason so far to compromise the relations existing at present between the respective countries. Mr. Blaine also said that he would not form any definite opinion about the affair until the conclusion of the investigation at Valparaiso."

"For our part," the article concludes, "we feel sure that those facts, when they become known, will put an end to all disturbing rumors."

May Get Germany on Her Back.

Two officers of the German navy were insulted Sunday night while on a train running between Santiago and Valparaiso. The German admiral Valparaiso complained to the intendente who has promised to use all his power to prevent a repetition of it.

A REASONABLE TIME.

Will the Administration Wait Before Any Action Is Taken?

New York, Nov. 2.—A special to The Herald from Washington gives an interesting view by its correspondent with a member of the cabinet regarding the latest details received from Captain Schley regarding the affair between Chileans and some of his sailors in Valparaiso.

"What do you think of it?" was asked.

"It is very bad. The first intelligence was bad, but this is worse. It is going to complicate matters."

"What will the administration do about it?"

"The administration has done all that it proposed doing at present. We have made our demand of Chile. We are now waiting for Chile's answer."

"How long shall you wait?"

"We shall wait a reasonable time. We shall act with moderation, but firmly."

Chili's Reply.

WASHINGTON, Oct. 31.—Thursday evening the following official statement was made:

The department of state received this morning a telegram from Minister Egan, dated Santiago, Oct. 28, in which he gives the following as the reply of the Chilean government to the president's telegram of Oct. 26, asking reparation for the recent murder of American sailors in the streets of Valparaiso:

"Minister for foreign affairs replies that the government of the United States formulates demands and advances threats that, without being cast back with acrimony are not acceptable, nor could they be accepted in the present case or in any other of like nature. He does not doubt the sincerity, rectitude or expertise of the investigation on board the Baltimore, but will recognize only the jurisdiction and authority of his own country to judge and punish the guilty in Chilean territory."

"He says the administrative and judicial authorities have been investigating affairs; that judicial investigation under Chilean law is secret and that they are not allowed to make known the result; when that time does arrive will communicate result, although he does not recognize any other authority competent to judge criminal cases than that established by the Chilean people. Until the time arrives to disclose the result of the investigation he cannot admit that the discovery in Valparaiso or the silence of his department should appear as an expression of unfriendliness towards the government of the United States which might put in peril the friendly relations between the two countries."

In Good Shape for War.

New York, Oct. 31.—Captain Erben, of the navy yard in Brooklyn, has made this statement:

"It is the opinion held at the yard that the trouble between our government and Chili will not go so far as to necessitate the sending to Valparaiso of some of the cruisers. Nothing official relative to the course of the government has been received here. In case it should become necessary to send part of the navy to South America not more than four ships would be needed to carry on our operations against Chili and its navy."

There are not more than three or four war ships in the navy which could offer resistance to our cruisers. It is hardly probable that England, Germany or any of the great powers of Europe will interfere between the United States and Chili should war result between those countries from the recent episode at Valparaiso, and if it should be considered necessary to send our navy to the South Pacific, there would be no need of troubling back a number of war ships to protect the coast in anticipation of trouble with European governments."

Mysterious Activity.

SAN FRANCISCO, Oct. 31.—Special telegrams from Valparaiso say that there is a great deal of mysterious and extraordinary activity about vessels of the navy.

The naval officers are forbidden to give information regarding the movement of vessels. A telegram was received Thursday asking for an estimate of the cost of preparing the Mexican for sea duty at once. Arrangements are being perfected to put a large force of men to work upon this vessel.

Egan Blamed for It.

New York, Oct. 31.—All the morning papers comment liberally upon the crisis reached in the controversy between Chili and the United States. While almost unanimous in the opinion that the government will not and should not submit to an injustice, several of them alleged that the policy of waiting and keeping as minister to that country an utterly unfit man, with improper instructions, is bearing its natural fruit.

CHILI AND THE UNITED STATES.

The Present Misunderstanding One of Long Years Standing.

WASHINGTON, Oct. 30.—The spirit which has marked the course of the Chileans toward this government might be easily accounted for if all the charges which are brought by them against this country were true. These indictments run as far back as the war between Chili and Peru. It will be remembered that when that war ended with a victory for Chili, the latter nation demanded that this was not forthcoming and proceeded to take a large slice of Peruvian territory. At this point the United States government interfered, and sent Messrs. William H. Trescott and Walker Blaine to South America in Peru's behalf. These gentlemen returned without accomplishing any definite result, but their visit is again emphasized by the Chileans as an unfriendly act on the part of the United States.

Coming down to more recent times, the Chileans have a number of charges to make against the officers and men of the Baltimore, which, although denied, have no doubt been maliciously circulated in Chili for the purpose of fanning the hostility to the United States. The first of these is the statement that when the congressional navy was searching for torpedoes in the harbor of Valparaiso, at night the electric search light beam of the Baltimore was turned upon their work, and that they were frustrated in their plans. This is positively denied by this government. Another charge is that when the insurgent army was landing on the coast just previous to the battle which resulted in the overthrow of the Baltimore, Admiral Brown steamed the San Francisco down to the place of landing and made a count of the insurgent forces, both as to the number of men and guns. It is alleged that he returned to Valparaiso and telegraphed this information to Balboa, enabling the latter to hurry his army to the point where the insurgents had secretly landed, and temporarily, although not finally, embarrassed the enemy.

The ground for this charge is said to be the publication of this information in the papers in Santiago on the morning after the landing, and quoting Admiral Brown as saying that he had said to the government in reply to this charge, that it can be proven that Admiral Brown never communicated with Balboa.

It is acknowledged that the admiral did sail down the coast and watch the landing of the insurgent army, but the same time it is known from private letters written to his family in Indiana that Admiral Brown's personal sympathies were with the insurgents, and that he was in his correspondence their financial success.

Another ground of complaint, in the eyes of the Chileans, amounts to their estimation of a virtual blockade of the Chilean coast. It is alleged that a bulletin was displayed in the chamber of commerce in Philadelphia warning all merchant vessels that it was dangerous to enter the port of Iquique at the insurgent capital, and that by reason of this bulletin American ships laden with provisions so much needed by the insurgents remained away. As the document has not been laid before the public, its existence is suspected to be a myth.

Equally baseless is the charge, too, that this government directed the president of the Central and South American Telegraph company in New York to restore Valparaiso to communication with the outside world, and that the company acceded to this demand under duress.

There is only one more allegation which the Chileans put forth which is deserving of attention, although it does not exhaust their list. This relates to the capture of the Itata, a private vessel worth \$200,000, but the United States accepted an appraisal of only \$90,000, in order that the bond might be secured without difficulty. All arrangements made with the owners of the vessel by the United States have been accepted to the former to their pleasure, but the Chileans on the other hand, have shown no disposition to accept any friendly overtures. No plainer proof of this could be needed, if the refusal of the United States to agree to the proposition that the Itata be released upon payment of costs, and that the criminal proceedings be entirely abandoned. By refusing to accept these friendly propositions the Chilean government has prolonged and intensified the irritation between the two nations.

ANTI-NEWISH RIOTS.

Five Women So Terribly Outraged That They Die—A Score of Jews Killed.

OBESSA, Nov. 2.—A letter from Starodub received here asserts that during the anti-Semitic riots in that town five unmarried Jewish women were so barbarously outraged and maltreated that they have all since died. According to this letter twenty Jews in all were killed during the disturbances here before the start of the anti-Semitic riots.

Starodub is reported from Balta, in Russian Poland, and its suppression was a matter of difficulty.

Squatters in a Snowstorm.

ASHLAND, Wis., Nov. 2.—Excitement grows intense as the date for filing on Omaha indemnity claims approaches. Whole columns of files arrive on every train, seventy-five coming in a body yesterday from Eau Claire and a similar number from other localities.

Large numbers have gone on to Iron River, where they will squat on land and take their chances on the squatter's rights giving them ultimate possession of it. A heavy snow storm howled over all of northern Wisconsin last night, whitening the shivering forms of the land squatters as they huddled over their poor fires in the forest.

A FAMILY FEUD.

One Dead, One Dying and Six Under Arrest for Murder.

MIDDLEBORO, Ky., Oct. 29.—For years past there has been a deadly feud going on among the family of Partin, who reside at the headwaters of Big Clay creek, about sixteen miles northwest of this city, which has culminated in the violent death of one and perhaps two of them. Late Monday night Sheriff John C. Colson and posse returned to the county seat, Pineville, having captured Flem, Bill, Columbus, Cyrus, Jack and Robert Partin, who are accused of the murder of John Partin, about ten days since. One month ago John Partin shot Alvis Partin in a drunken row. Bill Partin and others were sent out to capture John Partin for this shooting. When it is claimed, they shot him down without giving him a chance to surrender, and it was for this murder that the sheriff and deputies captured these men. Alvis Partin, the man first shot, is not expected to live. These men are dangerous of the worst type and they live in one of the toughest sections of these mountains.

BUSH WILL HANG.

He Protests His Innocence, and Says He Will Not Confess to Save His Life.

STANTON, Ky., Oct. 29.—Simpson Bush, confined in the Stanton jail, sentenced to hang for the murder of his wife in Clay City, was considerably affected when I informed him that his case had been affirmed by the court of appeals.

He remarked that he was innocent of the charge and as well prepared for death as he ever would be, and said he would not confess that he did the murder in order to get his sentence commuted to life imprisonment; that he would not confess to a thing that he did not do. Bush, according to the sentence pronounced at the last term of the Powell circuit court by Judge Riddell, will be hanged at a point near the jail in Stanton, on the 18th day of December next. Bush claims that either he or one of the other occupants of their room did the shooting. Should Bush claim it will be the first legal hanging ever done in Powell county, Ky.

NOW IT'S MILT.

Another of the Offshoot Gang Under Arrest at Somerset, Ky.

SOMERSET, Oct. 29.—Milton Gilliland, one of the members of the notorious Gilliland gang, is occupying a cell in the county jail, charged with house-breaking. Young Gilliland is a nephew of the notorious Doc Gilliland, and is charged, with several of the gang, with house-breaking, etc. The last grand jury found indictments against some sixteen of the Gilliland gang. Up to this time Milton Gilliland is the eighth one placed under arrest, and he is charged with the same offenses as the others. Some eight more who have been indicted but not arrested as yet. Some of them he said they will not be taken alive. All who have been arrested heretofore have given bond.

Incendiary Fire at Sebree, Ky.

HOPKINSVILLE, Ky., Nov. 2.—The large planing mill of N. Bennett, situated at Sebree City, a station on the Hopkinsville, together with several adjoining buildings, was entirely destroyed by fire. It is supposed to have been the work of incendiaries, instigated by the White Caps, in revenge for the movement against the White Caps in that section, and it is believed that the fire was set by the entire village, which would have been accomplished had the loss been in the right direction. The loss is about \$5,000, with no insurance.

Through Grief for His Young Wife.

CANEY, Ky., Oct. 31.—A young man, Wallace committed suicide at Golden Point, this county, by taking morphine. His wife died a few days before, and he became despondent and gloomy. He left a note to his brother, telling him to dispose of his property and pay his debts; that he had gone to meet his wife, Wallace was about twenty-five years of age.

Child Burned to Death.

GRAYSON, Ky., Nov. 2.—A four-year-old child of John Salmons, of Tygart, was burned to death. The child was playing in a spring for water, leaving the child alone in the house. By some means its clothing caught fire, and it burned to death. The child was found by its mother, who saved the house from burning.

Killed His Brother.

BARBOURVILLE, Ky., Nov. 2.—While showing his brother a pistol, T. B. Barbour shot and killed his brother, John W. at Gray, this county, the bullet penetrating the brain. The Barbour boys stand high in this community, and the affair cast a gloom through this part of the state.

Pretty Red Famine, This.

LOUISVILLE, Nov. 2.—The failure of the Louisville State company was superinduced by the assignment of a twin establishment, namely, the R. B. Colter Lumber company. The liabilities are estimated at \$500,000, with assets about ten cents on the dollar.

CONVICT MINERS SET FREE.

Tennessee Free Miners Take the Law Into Their Own Hands.

KNOXVILLE, Tenn., Oct. 31.—Friday afternoon the Coal Creek valley was the scene of unusual excitement. The free miners becoming disgusted with the manner in which the convict leasing system had been treated by the recent session of the legislature, took the law into their own hands.

About 3,000 miners from all sections of the county, heavily armed, marched to the stockade of the Tennessee Mining company and the Company stockade, overpowered the guards and released over 300 convict miners. Most of them were provided with clothes and told to go. They carried out all obeying. In the meantime the magazine was blown up.

Hundreds of shots were fired in the air to intimidate. No lives were lost and nobody injured.

Governor Buchanan and Superintendent Wade arrived here Sunday evening. The released convicts all participated in the riot, and the burning of the stockade and the release of the convicts.

Two Hundred More Released.

CLINTON, Tenn., Nov. 2.—Over two hundred convicts at Oliver Springs, fifteen miles west of here, were released by miners late Sunday night, or early Monday morning. All the stockades were burned together with everything around them. No resistance by guards was offered. The attacking miners were armed with Oliver Springs. It is thought they were Kentuckians.

Action of the Governor.

KNOXVILLE, Tenn., Nov. 2.—Sunday at Briceville passed quietly. The released convicts are still at large in the mountains in eastern Kentucky. A few of the large oil companies have been captured, and doubtless more of them will be brought back.

Governor Buchanan arrived here Sunday night. He offers a reward of \$25 for each convict captured, and \$5,000 for the arrest and conviction of the leader, and also the same reward for the arrest and conviction of the conspirator in the riot that resulted in the burning of the stockade and release of the convicts.

Attorney General Pickle was seen by the governor, but having heretofore fully advised the state officers upon all legal aspects of the question, and it being the duty of his office to advise as to the policy of the administration, nothing of official nature passed between them.

General Pickle, being constantly engaged by his duties in the supreme court, will not be able to extend such courtesies as he extended the governor on the former occasion.

The governor has ordered the militia to be ready for duty at a moment's notice. There is rumor abroad that the militia will be called out to liberate all convicts working at Briceville, Oliver Springs, Tracy City and Iman.

AMERICAN PORK AND CORN.

Minister Phelps Takes a Peculiar Plan to Introduce Them Into Germany.

BERLIN, Nov. 2.—Minister Phelps has taken a peculiar and highly original way of introducing American meats and corn, to the attention of the Berliners and of Germany generally. He gave a dinner Saturday to a number of German notabilities and their wives, including Dr. Miquel, minister of finance; Dr. DeBoettcher, secretary of the interior, and a number of other leading men of the empire and of Prussia.

The banquet included all the luxuries of the season, and was of the highest order in every respect, but chief and peerless among the dainties, from an American point of view, was the bacon and cornbread from America. Mr. Phelps evidently has the benefit of a cook who cannot be surpassed in Virginia in the art of making cornbread toasts, and all the German guests united in praise of the article as presented on Mr. Phelps' table.

Dr. Miquel made some earnest remarks in praise of both the bacon and the cornbread, and said that hereafter cornbread should be included among the supplies from his personal table.

It is more important was the statement that the German duties on Indian corn would soon be removed and American cornbread fed to the German army, thus rendering Germany independent of Russian rye.

Any action of this kind would need action on the part of the reichstag, which meets on the 17th inst., and in which the question of commercial treaties and the removal of duties will not do be discussed with considerable interest and animosity.

MORAL DEPRAVITY.

A Remarkable Case Developed at the New York Barge Office.

New York, Nov. 2.—A most remarkable case of moral depravity developed at the barge office Sunday. Among the passengers arriving on the steamer Puert Blamarck was a family named Mueller, who came from Mecklenburg, Germany. It consisted of the mother, who was about fifty years old; a daughter named Margaret, twenty-two years old; two smaller children and a young man who came with them, but claimed no relationship.

As they passed the registering clerk's desk they noticed that the girl Margaret was enceinte. When asked who was the cause of her condition she pointed to the young man. Upon this statement the whole family was detained. The clerk would not allow them to go unless the couple were married. This they agreed to do, and a minister was called.

In answer to questions the couple gave the name of Mueller, and this caused the dominie to become suspicious. In answer to questions the couple gave the name of Mueller, and this caused the dominie to become suspicious.

Upon this asserion the ceremony was performed. Later it became known that the couple were brother and sister. The barge office authorities were furious when they learned this fact and the matter will be referred to the United States district attorney. The family will be sent back to Germany. The marriage is of course void, both legally and morally.

Morton Memorial Services.

HUNTSVILLE, Ind., Nov. 2.—Memorial services for the death of the late Governor Morton were held at the Methodist church in this city Sunday afternoon. The services were held under the auspices of the James R. Slaight post, Sons of Veterans and Woman's Relief Corps. Several eminent speakers were present, one of whom was ex-Governor Cumback, of this state.

Fell from a Window.

ST. PAUL, Nov. 2.—Mrs. Lucy Todd Gilbert, mother of Bishop M. N. Gilbert, was found early Sunday morning lying dead in a pool of blood in front of Bishop's residence. It is supposed that she arose in the night and went to the window to look out, but fell and being accustomed to the house (she had just arrived from Sherburne, N. Y.), fell out of the window. She was seventy-eight and feeble.

Shot a Chicken Thief.

PARIS, Ky., Nov. 2.—Sunday night "Squire" Royster shot at a gang of thieves who were raiding his henery, and succeeded in killing one of the gang, a colored man. The "Squire" first shot at random in the darkness, but when he saw them advanced on him, shooting at them, and he then fired the fatal shot.

Lake Steamer Founders.

DUNKIRK, N. Y., Nov. 2.—The steamer Pacific of Detroit, lumber-laden, foundered this port in the gale at 3 o'clock Sunday morning. No small boats belonging to the steamer came ashore with the wreckage, and it is thought that the crew were picked up, as four other vessels were seen in the gale.

Second Attempt Successful.

STEVENSVILLE, O., Nov. 2.—While drenched through heavy drinking, John Hanlon, wife of a saloon keeper, attempted suicide Sunday by hanging herself. She was cut down, Monday morning she took a dose of Paris green and died shortly after from the effects of the poison.

3 a.m.—One thousand six hundred and nineteen election districts in New York State, outside of New York and Kings counties, give Flower 177,886; Fassett, 190,000. The same districts in 1888 gave Hill 197,824, Miller 242,279.

1,735 districts (outside New York and Kings), not yet heard from, gave, in 1888, Hill 201,254; Miller, 220,915. Miller thus had in these districts a plurality of 19,661.

In case Fassett should have this same plurality in the districts yet to hear from, his total plurality outside New York and King's counties would be 31,975. Flower's plurality in New York City being 58,299, and in Kings county about 14,000, it would thus appear probable that Mr. Flower's majority could be somewhat over 40,000.

OHIO.

CINCINNATI, O., Nov. 3.—The election to-day was one of the most quiet, orderly, business like and satisfactory ever held in Cincinnati since the good old times when everybody knew everybody else and all were honest. The new election law based on the Australian system was tried for the first time. The election day was entirely free from disorder.

At midnight Gov. Campbell conceded the election of McKinley by 15,000 plurality.

Chairman Hahn, of the Republican State Committee, at 1:45 a. m., claims the State by from 19,000 to 21,000, and the General Assembly by from 31 to 33 on joint ballot.

MASSACHUSETTS.

Boston, Nov. 3.—Up to midnight returns have been received from 100 towns, and the indications are that Russell, Democrat, is elected Governor by 5,000 majority. The Journal and Advertiser, both Republican, both concede Russell's election, but place his plurality at 3,000.

IOWA.

DES MOINES, Nov. 3.—At 2 o'clock this morning the Republican Committee have closed headquarters and gone home. Reports received at Democratic headquarters continue to show Democratic gains, and indicate a majority for Gov. Poies of from 6,000 to 10,000.

VIRGINIA.

RICHMOND, Nov. 3.—The Demo-

crats will have more than two-thirds majority in the Legislature.

MARYLAND.

The Democratic candidate for Governor has been elected by from 15,000 to 20,000 majority.

The Republicans gain in Nebraska, Colorado, and South Dakota.

PENNSYLVANIA.

Philadelphia, Nov. 3.—The Republicans have carried the State by 50,000 majority.

NEW JERSEY.

Trenton, Nov. 4.—The Democrats will have the largest majority ever held by either party in the legislature.

KANSAS.

Topeka, Nov. 3.—The latest returns indicate that the Republicans have gained their lost ground. The People's Party did not hold its ground.

THE LATEST.

[Special to the Press.]

LOUISVILLE, KY., Nov. 5.—New York gives Flower, the Democrat, 40,000 majority. McKinley carries Ohio by 19,000. Iowa re-elects Boies, Democrat, for Governor, by 8,000 majority.

THERE will be an abundance of committees at Frankfort this winter to look after the interests of various concerns; the farmers have recognized the virtue of lobbying and will have a committee there also. As there are fifty and seven farmers in the house, the interests of those people are not likely to be overlooked.

A RECENT earthquake in Japan killed 4,000 people, injured 5,000 and destroyed 5,000 houses; thousands are hungry in Russia; in Ireland they are breaking each other's heads with clubs. The South American countries are continually at war; England has a Prince of Wales. The United States is still the best country on earth.

We hear no teachers complaining that their schools are slimly attended, but on the other hand many report the attendance so great that one teacher cannot do justice. This is a gratifying situation of affairs. It shows that the people of Crittenden are alive to their best interests, and appreciate the demands that will be made upon their children in the battle of life.

Boston furnishes a bank suspension this week; it was the Maverick bank, and President Potter and Directors French and Dana are under heavy bond to answer the charge of misappropriating the bank's fund. The only redeeming feature of many of the recent bank failures is that the dishonest officials are landing in the penitentiaries, a place peculiarly fitted for such ruffled front thieves.

The English evidently sympathize with the Chilians in the misunderstanding between that country and the United States. The London Times says of the affair:

"The Chilians would be more or less than human if they did not resent Minister Egan's hectoring and brow-beating tone. Unless they come to his assistance by a departure from the moderate attitude they now maintain, it only remains for Mr. Blaine to climb down as softly and gently as he can. The American people are certainly concerned to discover and punish those who employed their ships and influence in ways which, if not absolutely corrupt, are at least extremely irregular and mischievous."

The new superintendent of Public Instructions, Thompson, is endeavoring to stir up more than usual interest in the educational affairs of the State. Two weeks ago he sent out a programme which the friends of education should heed. Since then he has sent out a letter asking suggestions in regard to changes in the school law. A meeting will be held in Louisville on December 2, for an interchange of ideas on this subject. A course of this kind will bring about a concert of thought and action on the subject of education, and arouse a deeper interest in this important subject. The public schools are growing in usefulness, as their work becomes more thorough, and the teachers more efficient, and a continual agitation will keep up the growth.

A Bridge at Evansville.

Courier Journal.

A company has been organized to be known as the Evansville Bridge and Terminal Company, which has

already taken the preliminary step toward constructing another bridge over the Ohio river, on the site of the Ohio Valley railroad ferry. On Monday the deal was closed for the actual purchase of the property. It is the intention of the Bridge and Terminal Company to erect handsome freight and passenger depots, which will require another large expenditure of money. Work on these new structures will begin as early as convenient, and they will be rushed to completion as early as possible. It will be a truss bridge, built of steel, with three spans, a channel span of 550 feet in length and two spans 430 feet each. It will be approached on a 1 per cent. grade and on a tangent, an engineering advantage. It will make the route to Henderson only ten miles, instead of twelve as at present, and will greatly shorten the time between the two cities, as half of the entire distance could be traversed while the transfer is being made at the ferry. The estimated cost of improvement is \$1,500,000, and it is expected to have the work completed before December 1, 1902.

Ex-Governor David Meriwether celebrated his ninety-second birthday last Friday. The Courier-Journal thus sums up his career:

"Gov. Meriwether has had a career marked by few. He has seen three Constitutions in Kentucky, and was one of the framers of the one that only a few weeks ago went out of existence. Fifty-nine years ago found him an active member of the Kentucky Legislature, and he succeeded Henry Clay in the United States Senate. He was Governor of New Mexico long before the great Santa Fe route was built in that country, and made the long journey from the Missouri river in a stage coach. The first house erected on the site of Kekuk, Iowa, was by his hands. Gov. Meriwether is a native of Virginia, but, with the exception of his boyhood days, has spent almost his entire life in Kentucky."

President Polk is reported as saying, on a return trip from the west, that the Alliance is growing rapidly in the west. Our information is to the effect that President Polk is deceived by appearances. He estimates by the new sub-unions returns of which from the Secretaries reach headquarters, but takes no account of those passing into dormancy and decay. We speak for Kentucky when we say the real active membership is probably not half what it was a year ago. It may be that the names of more than that number will be found on the list, but they are not paying their dues and participating in the meetings. The cause for this is to be found in the fact of the attempt to make a political party of the organization. Where this has been attempted the membership has fallen off and it can not be denied. President Polk deceives his own ears and eyes with the greater noise made by the few than the many. The organization of farmers was commended for the editors desk to the preachers pulpit as an uprising of a wronged class to right their wrongs. But when this movement becomes a separate political party demanding extreme legislation in advance of the proper discussion as to constitutionality, the rights of others, etc., the general public holds to consider the effect.

The masses of farmers even will not be rushed pell-mell along into such deep waters. Nor will they hastily leave political associations in which they have confided to try their fortunes among adventures whose experience in public affairs is too limited yet to make leaders of them. We predict that not one-third of the Alliance members in this part of the country will be dragged into the People's party. We predict further, that if the extremists get control of the State meeting at Elizabethtown the membership will soon fall to about the number of the People's party votes cast at the last State election. The conservative thinking members, whether their former affiliation was with one or the other of the old parties, will not go along with an organization that is drifting out into the unknown.

The policy of the Alliance should be to keep politics out of the State meeting—to elect no board of officers wholly from one political party—not all Democrats or Republicans, and by no means all People's party men. Of course, whoever may be chosen should be men above reproach and with good business leads on their shoulders. We do not here refer to any one, but the chief officers should be men who have not made failures in their own business affairs. We do not mean to reflect on a man because of having failed in business if it be in some great venture, or by a combination of adverse circumstances. But there is a class of easy-going, slipshod, careless men whose estates have been badly managed, and they can not successfully manage the Alliance because, if it lives, it will have to deal in the near future with some giant problems of buying and selling. The importance of the selection of good officers is not to be overlooked.—Farmers Home Journal.

IMBODEN IN JAIL.

The Reward Not Long in Finding Him.

Sunday Constable Wm. Dyer and Frank Heine, of Caseyville, came to Marion with John Imboden in their charge, and turned him over to Jailor Adams to answer the charge of murder at the December term of Circuit Court. The \$200 reward offered by the Governor put them in search of the fugitive and they soon located him at a coal mine in Gallatin county, Ill. Saturday night they sent a boy to his house to tell him that a couple of men were at a certain place, near by, anxious for a game of poker. Imboden soon appeared, and before he had time to take in the situation the muzzle of a pistol met his astonished gaze, and at the command, he threw up his hands.

The deed with which Imboden stands charged was committed on the 29th day of last December, and the circumstances of the killing as described in the PRESS at the time were as follows:

Monday evening, near Weston in this county, Imboden shot and probably fatally wounded Jordan Hughes, a negro boy about twenty years old. Imboden, with a couple of friends was sitting on the roadside about half-mile south of Weston, when Jordan Hughes rode up to where they were, and the latter addressed Imboden and his friends in these words:

"Good evening, white man."

The reply from the party addressed was:

"Good evening, niggers," and at the same time Imboden raised his gun, saying, "I will kill a negro, too," and fired. The contents of the gun struck Jordan Hughes in the back, just as he wheeled his horse, and fell to the ground. All the parties except the wounded man, left the scene immediately. Shortly afterwards passers by found the wounded man, who died the morning after he was shot.

Imboden had left for parts unknown.

Kukluxing.

Monday, at the instance of John Nelson, a warrant was issued charging Jas. Dailey and Wm. Dailey with "banding themselves together for the purpose of intimidating, alarming and disturbing the family of Nelson by throwing rocks and rails at his house, thereby injuring members of his family." Others were in the affair besides Dailey, but they were not identified. There is a special statute for such offenses and it provides that upon the conviction of the accused in such cases they shall be fined in any sum not less than \$100 or more than \$500, or sentenced to the penitentiary for a term of not less than six nor more than twelve months.

LATER—The Dailey brothers were captured Wednesday by Deputy Sheriffs Wheeler and Dulany and brought to Marion. Failing to give a bond of \$500, they were placed in jail.

In Uncle Sam's Clutches.

Tuesday the Deputy United States Marshal from Paducah came to this county and arrested Dick Edmondson upon the charge of selling liquor without license, and took him to Paducah for investigation. The offense was committed at the Pine camp-meeting last August. Edmondson is said to be one of a gang who are making a business of peddling liquor through the country. The two Sam Walkers went to Paducah Wednesday as witnesses in the case.

Lyon County Trouble.

An effort to compromise the Lyon county railroad debt is still being made. Mr. James C. Glenn, chairman of the Sinking Fund Commissioners was in Louisville yesterday to meet the bond holders. The Courier-Journal says:

Until yesterday it was impossible to learn what the county offered the bond holders in the way of compromise. The bondholders stated that they would accept 50 per cent, and the interest due. The offer that they will consider to-day is 60 per cent. It is 60 per cent. on the \$160,000 without the interest due. The county offers to settle for \$96,000. The 50 per cent. of the bondholders is \$80,000, which with the \$48,000 interest makes \$128,000. The difference between the parties is \$32,000.

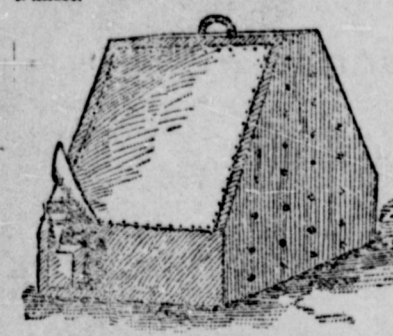

Chairman Glenn was seen at the Fifth Avenue Hotel last night. He stated that the offer of compromise made by the county was as given above; that it was the best the county would do, and if it was not accepted the matter would have to go into the courts again. He said when the bonds were voted the county was to be a stockholder of the road. The road was mort

FARM GARDEN

SHIPPING COOPS.

Two Designs for Nest, Light Coops in Which to Ship Poultry.

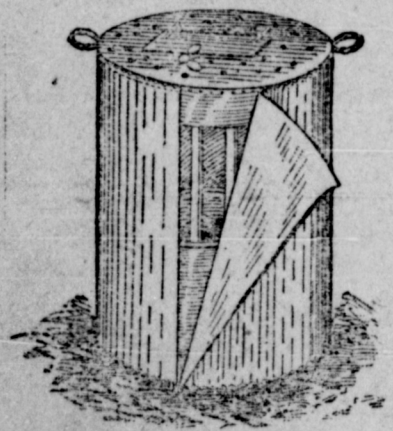

A careful manner of shipping poultry will materially curtail the profits of any poultryman. The value of the stock is likely to be depreciated by it, and chimney, cumbersome coops will unnecessarily increase express charges. Farmers as well as breeders of fine stock are always interested in designs for light shipping crates, and we therefore reproduce from a number of these described and illustrated by The Southern Poultry Farmer. The following is the design of the coop in accordance with the plan shown at Fig. 1 has the end of the coop of solid wood 4-inch material and is bored full of holes for ventilation. The front and back of coop has 2-inch board at the bottom, also bored full of holes for ventilation. The sides are sloping to correspond with ends. Burlap or calico is then tacked on running from the top of the 4-inch board to the top. The board is 12 inches wide and 22 inches long, the coop when finished being 23 inches square and 23 inches high at ends. A can is nailed in the corner for water. A small funnel runs into the water can. Over this funnel is posted the following notice: "Please pour water in this funnel for the fowls." An opening is cut in the top board as long and wide as it will allow for ventilation. A small feed trough can be tacked on inside, but I do not use one, as fowls eat very little in transit.

A COMMODIOUS SHIPPING COOP.

"For very long distances the feed trough might be an advantage, with a large mouthed funnel through which to pour the feed. This coop is strong, has plenty of ventilation and the fowls are sure of water if well attended to in transit. Besides, it is very light, 4-inch stuff being heavy enough for bottom and all. The coop here described will hold four fowls, large size."

In the second cut is illustrated a cheese box coop. It is the invention of a correspondent of The Poultry World, who wrote as follows concerning it: "The cheese box coop has met with such universal favor that I wish others to have the benefit of this handy, light and altogether desirable arrangement. Plenty of empty cheese boxes can be found at our retail grocery stores, and from five to eight cents each, also coarse sack that will cut up so to make four boxes for ten cents. Two strong laths cut into four 18-inch lengths, a few nails, one fourth pound of tacks, and fifteen minutes' time with a hammer and clinching iron and the thing is done. The weight is about eight and a half pounds."

A CHEESE BOX COOP.

"In it the chicks are not easily frightened and it does not injure their combs or break their feathers. I sent a pair of white Leghorns to a store in Pennsylvania in one of these boxes, and the officers were so well pleased with the idea that they had it placed on exhibition. The chicks, after being awarded first premium and silver cup, were returned to me without a feather being soiled or rubbed. In warm weather I use six posts, placing two on opposite sides, one and a half inches apart, inside of which are fastened cups for food and water. In cold weather I put the food in the bottom of the box, and water is not necessary."

The White Caps of Monroe county, Ind., are likely to come to a head. Secretary Blaine in Boston, en route to Washington said: "The past summer has been one of the most pleasant epochs of my life, and the results have been most happy personally. It will be hard to make some of the newspapers believe that I am a well man, but that is a fact, nevertheless."

A SUCCESSFUL BEEHOUSE.

An Indian's Plan for a House in Which Bees Are Easily Managed.

The beehouse is 18 by 10 feet and 7 feet high in the clear. It is built and the 4-inch space between the inner and outer walls is filled with dry sawdust. There is a 4-inch ventilator through the roof. It will hold twenty-four ten frame Langstroth hives, each super containing thirty-two one pound sections. The hives are placed two inches from the wall, and the openings of the chimneys are covered with wire cloth.

A BEEHOUSE.

The apiarist who thus describes in American Bee Journal his plan for a beehouse such as is shown in the cut here reproduced says in regard to its management:

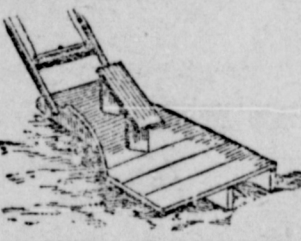

"In winter the chimneys are closed on the outside, and the bees get air from the inside of the house. In summer time, when it is hot, I use nothing but burlap on top of the hives, and I have no bees hanging out—they stay in the hives. I can go into my beehouse at any time of the year without starting robbing, and by opening the winter door and closing the screen door I have all the light necessary from the door to take off honey or examine any hive."

I never lose any bees in my beehouse, as they have a light at any time during the winter, when it is warm enough, or I can close them up at any time. From the bees kept in the house I get more honey than from those that I keep out of doors, and I am so well pleased with my beehouse that I have built another one, and shall keep all of my bees in the house."

There are so many advantages in managing bees during wintering that I house like mine that I shall not attempt to enumerate them.

A Kansas Corncripper.

The cut shows herewith represents a corncripper said to be in use in some parts of Kansas. The runners of the sled are made of hard wood and are 2 by 6 inches and 6 feet long. The floor is of inch boards and the seat of 2 by 4 inch stuff bolted on.

A CONVENIENT CORNCRIPPER.

The cutting knife is a strong scythe, three feet long, set slanting and bolted securely to the sled. The sled is drawn by shafts which, when the horse is turning around upon the knife, a man can handle the corn if not too heavy. He grabs the corn with both hands and lets it fall across his knee until he has a full bushel, then casts it off, says The Farm Journal, from which our cut is reproduced.

Points in Onion Culture.

Many amateurs do not know at what time to sow onion seed to raise sets, when they are gathered and how taken care of. Country Gentlemen thus makes the matter plain: "The sets are required of small growth, and therefore a poor soil is better than a rich one; this soil is thoroughly pulverized and made smooth, the seed sown by a line quite thickly, and as large ones are not run up to sow, the line should be less than the size of grapes. They are taken up in August, dried, balled in chaff four inches deep and covered with several inches of hay for protection through winter. Early in spring they are set out in extra rich land, the variety indicated, three inches apart in the rows, the earth pressed compactly about them. They are to be kept perfectly clear of weeds till the middle of June, when they are first taken up for market. The Strawning and Yellow Danvers are found best for this treatment. The Wethersfield red is more productive, but less adapted to sets."

Crop Statistics.

The average for potatoes in the government report is 94.8; for tobacco, 87.4. It has been officially reported that the wheat crop of North Dakota is about 50,000,000 bushels.

State averages for the corn crop are generally high, especially for the southern states. The average for the averages are those of Michigan and Wisconsin.

In Statisticians Dodge's report a small advance is noted in all the cereal crops except buckwheat. The general average is as follows: Corn, 91.1; wheat, 89.3; rye, 93.1; oats, 90.7; barley, 92.3; buckwheat, 90.6.

Plow the oat ground and, unless too steep, let Jack Frost do the only harrowing, sled off the rocks and stumps and when returning for a load carry manure. Next spring harrow without plowing, sow the oats and grass and seed smooth. A good crop of grain and sure catch of grass may be depended on, says The Farm Journal.

According to the department of agriculture at Washington, the condition of wheat is unusually high. The figures for the principal wheat growing states are as follows: Ohio, 98; Michigan, 93; Indiana, 100; Illinois, 100; Wisconsin, 90; Minnesota, 100; Iowa, 99; Missouri, 94; Kansas, 99; Nebraska, 98; North Dakota, 94; South Dakota, 93; Montana, 98; Oregon, 97; Washington, 93. East of the mountains, New York, 99; Pennsylvania, 99; Maryland, 97; Virginia, 93. In the southwest, Texas, 97.

How the Kangaroo Fights.

The kangaroo fights with great address and intelligence, and if he can find a stream or water hole in which to wait his prey will station himself to wait down it, and pushing the dogs under one by one as they swim out to attack him either drown them outright or compel them to retire for want of breath. Against human enemies, armed only with clubs or sticks, the kangaroo often shows himself a clever boxer, warding off blows very dexterously with his forepaws, and now and then making forward bounds, with rapid play of his dangerous hind feet, which are difficult to avoid.—Boston Journal.
